EDUCATION

Columbia University – Columbia College **New York, NY**
Bachelor of Arts in Cognitive Science, Specialization in Intelligence May 2029
Minor in Computer Science
GPA: 3.95
Notable Coursework: Discrete Mathematics, Linear Algebra, Data Structures in Java, Fundamentals in Computer Systems

PROFESSIONAL EXPERIENCE

b2b.mp3 – Independent Digital Creator & Brand Partner **New York, NY**
Short-Form Content Strategy & Audience Growth 2026 - Present
- Built audience of 75,000+ followers across TikTok and Instagram in under three months through short-form content development
- Partnered with audio technology companies Xvive Audio and ACE Studio and J-pop group ONE OR EIGHT on sponsored campaigns

Lisman Laboratories **Bronx, NY**
Researcher (2023) & Paid Intern (2024) June - July 2023, 2024
- Conducted differential gene-expression analysis of Allen Institute neuron morphological and transcriptomic data to identify developmental patterns relevant to neurological disorders

LEADERSHIP EXPERIENCE

sustAIn, Inc. **New York, NY**
Founder & Board Director 2024 - 2025
- Founded non-profit organization to elevate student voices in AI ethics discussions spanning education and society
- Organized guest-speaker panel with Columbia professors Shipra Agrawal and Asaf Cidon to connect student and academic perspectives

HeyBusking **New York, NY**
Founder, President & Performer 2020 - 2025
- Built platform connecting musicians with local venues, organizing 50+ performances and raising $3,000+ for non-governmental organizations

PROJECTS & PUBLICATIONS

K-Bopping: AI Content Automation July 2026 - Present
- Designed and deployed automated pipeline to generate and post AI-created K-pop mashups, growing channel to 1,000+ subscribers in one month

Deep Learning for Music Information Retrieval 2024 - 2025
- Collaborated with Stanford CCRMA professors to train machine-learning models for cross-genre singing style transfer
- Published *"Generative Singing Style Transfer Across Genres"* through the International Society for Music Information Retrieval

Journal of Student Research November 2023
- Published *"Supervised Fusion Music Composition Through Long Short-Term Memory Stochastic Modeling"* on AI fusion music generation using LSTM and recurrent neural networks

SKILLS & INTERESTS

TECHNICAL SKILLS: Python, Java, C#, HTML, CSS, PyTorch, SciPy, pandas
RESEARCH: Machine learning, statistical analysis, differential gene expression, audio signal processing, music information retrieval
LANGUAGES: English (Native), Korean (Working Proficiency), Chinese (Basic)
HONORS: National Merit Scholar; 1st Place – Marvin Hamlisch International Music Awards, Youth Film/Media Scoring (2024)
INTERESTS: Film scoring, DJing, skiing, cooking, web design, drawing
